

ELECTRONICS TECHNICIAN IN BERLIN, GERMANY (M/F/D)

Inuru is an award-winning high-tech company and manufacturer of active packaging and labelling products, that are capable of lighting up, warning on expiry date, displaying small animation and even video in future.

Our products fill the need of brands in the field of Fast-Moving-Consumer-Goods for a personalized brand experience and a better shelf visibility in retail and for home delivery. Amongst Inuru's customers are the most valuable brands worldwide.

In order to support the growth of the company we are searching for an Electronics Technician to be hired from the first quarter of 2021.

YOUR TASKS

- Manufacture electronic assemblies from Flex or Rigid PCB and SMD components for integration into flexible electronics Identification and coordination of supplier orders

YOUR SKILLS

- Experience in manual or automated electronics manufacturing and electronic component integration (SMD)
- Fluent in German and English

OUR OFFER

- You will work in a full or half time position working on the world of tomorrow already today
- Bring in new ideas and take responsibility for own projects to grow the company together
- Young diverse team – we are professional but laugh a lot
- Come as you are - work in a truly tolerant, international team
- **No bullshit-culture**
